Editor's Note

I am delighted to introduce and welcome the *International Journal of Business, Social and Scientific Research* (IJBSSR), a multidisciplinary peer-reviewed online journal that publishes rigorous theoretical and advanced empirical research in Business, Social and Scientific Research. The key objective of this journal is promoting interdisciplinary collaboration across various regions of the globe. IJBSSR is published in print form (**ISSN:** 2519-5530) and online (**ISSN:** 2309-7892). Articles are accepted for publication after double blind peer review. The final evaluation of the revised version is made available at ijbssr.com as soon as it is published. All material published in the IJBSSR can be viewed and downloaded for free at the journal's website.

Our online journal has been successful: we have seen a steady increase in readership, article submissions, and citations to our published articles. Our reputation and visibility in the academic community continues to broaden, and our honorary editorial board constantly reassesses and revises the editorial process to ensure the most efficient and satisfying experience for both authors and staff. The journal aspires to be vibrant, engaging and accessible, and at the same time integrative and challenging. All submitted papers, however, will be subject to the journal's double-blind review process.

On request, we have taken an initiative to upload original research papers which have not been published elsewhere. Interested researchers may also opt to have their works printed in the quarterly research journal soon to be launched. Papers are also invited for publication in our online/printed journal.
